

# VARUN KANNA

[varunkanna1@outlook.com](mailto:varunkanna1@outlook.com) | [LinkedIn](#) | [GitHub](#) | Pleasanton, CA

## Education

---

### University of California, Santa Cruz

Expected Graduation June 2026

*Bachelor of Science in Computer Science*

*Santa Cruz, CA*

*GPA: 3.96/4.00*

*Relevant Coursework:* Computer Systems and C Programming, Data Structures & Algorithms, Computer Architecture, (CodePath) Web Development

*Activities:* UCSC Google Student Developer Club, UCSC Association for Computing Machinery

## Skills

---

**Front End:** React, JavaScript, TypeScript, Tailwind CSS, HTML/CSS

**Back End:** Python, Node.js, Express, MongoDB, Firebase

**Testing/Deployment:** Jest, Jenkins, MinIO, Locust

**Developer Tools:** Git, Vite, Netlify, GitHub

## Work Experience

---

### SS&C Technologies

San Francisco, CA

*Software Engineer Intern*

*July 2024 – September 2024*

- Enhanced performance test visualization by developing Python scripts that condensed 242+ graphs into one report
- Developed a Jenkins pipeline to automate ETL, cutting manual effort by 83.4% and execution time by 33s
- Optimized performance test reporting by automating outdated file removal in MinIO, reducing storage usage by 27%
- Presented AI-assisted testing proof-of-concept by researching tools to demonstrate AI's potential in test automation

### IBM

Remote

*Accelerate Program Participant - Software Track*

*June 2024 – July 2024*

- Completed an 8-week program on Front-End, Back-End, REST APIs, Generative AI, and Cloud Native Development
- Built a task app with React, Node.js, and MongoDB with real-time updates and a streamlined user experience

### Innovate Mobile

Remote

*Full Stack Software Engineer Intern*

*April 2024 – June 2024*

- Developed a full-stack web application using MongoDB, Express.js, React, and Node.js for an aggregator app
- Migrated 6,103+ data entries from SQLite to MongoDB, leading to a 64.8% improvement in query performance
- Directed modeling of data and API endpoints for seamless integration between front-end and back-end systems
- Enhanced data processing automation by 14s through email scraping and user data integration using Python
- Maintained unit tests for the existing codebase, increasing code coverage to 65.6% and reducing bugs by 32.7%

## Projects

---

### TCG Tracker - Pokemon Card Tracker | *JavaScript, React, Node.js, Express, Firebase*

- Designed a card grading tool that enables users to assess grading value and profitability of their collection
- Leveraged Google Cloud Vision API to automate card identification and entry, resulting in a 35% time saving
- Boosted collection tracking efficiency by 27% by developing a collection management system with Chart.js

### SelfTour - Itinerary App | *TypeScript, React, Firebase, Firestore, Tailwind CSS*

- Engineered an app linking travel planners and travelers for AI-assisted itinerary planning and route optimization
- Achieved a 41s reduction in itinerary planning time for users in congested cities with a streamlined user experience
- Increased application responsiveness by 26.8% by developing frontend and backend using React and Node.js
- Improved overall performance by integrating Firebase for data management and TypeScript for data validation
- Leveraged Chart.js to design a collection management system, resulting in a 27% boost in efficiency for managing collections

### SmokeScreen - Blocker for Content | *JavaScript, Chrome Storage API*

- Pioneered a Chrome extension to block specified content, improving efficiency by 33.7% using agile methodologies
- Strengthened the functionality of the extension by debugging 54+ edge cases to ensure content is blocked properly
