EXPERIENCE

SmokeScreen | Santa Cruz, CA

November 2023

Winner Of ACM Hacks x GraceHacks

- Secured first place in a competitive hackathon by collaborating with a team in the development of a Chrome extension to block user-inputted content
- Engineered the backend functionality of the extension using the Chrome Storage API and JavaScript
- Conducted thorough testing on platforms like YouTube to identify and address edge cases and unexpected user behaviors

PROJECTS

Maomorize | Santa Cruz, CA

January 2024

- Developed the backend infrastructure to create a seamless user experience through utilizing Firebase and Firestore
- Achieved streamlined data storage and retrieval through the implementation of server-side JavaScript, optimizing performance in data handling processes
- Enhanced user navigation and overall website design by implementing routing functionalities using React Router with Vite

Spotify to Youtube Playlist Converter | Pleasanton, CA

June - Aug 2023

- Developed a custom Python automation tool to streamline playlist conversion by utilizing the YouTube Music API and Exportify
- Automated playlist conversion to reduce the time needed to add songs on average by 40% and benchmarked this for various album sizes ranging from 100-1000 songs
- Enforced CRUD functionalities to improve the user experience by implementing type checks to account for any errors

NBA Player Comparison Tool | Pleasanton, CA

Apr - May 2023

- Engineered a Python script to compare players by using Pandas & Numpy to handle player objects
- Retrieved specific statistics that contributed to more up to date more comparisons between players by utilizing the NBA API
- Implemented a menu tool to make the process of comparisons much easier with Agile Methodologies
